COL David W. Coker
Project Manager
PM Logistics Information Systems

» PM's Corner

Vol 1 Issue 2

Welcome to the dawn of a new era at PM LIS!

I recently returned to my post as the Project Manager Logistics Information Systems (PM LIS) after temporarily serving as Project Director Logistics Modernization Program (LMP). As many of you also know, the Program Executive Office Enterprise Information Systems (PEO EIS) organizational changes that included bringing LMP under the command and control of PEO EIS, changed several other organizational relationships. The new Program Manager for Single Army Logistics Enterprise PM (SALE) stood up in March to provide leadership and management for PM LIS, PM ELS, PM LMP and PdM PLM+. Under this new alignment, the current and future needs of the Army's logistics management information systems will receive careful management.

As the PEO EIS and PM SALE senior leadership make decisions and implement them concerning the PM SALE organizational structure, mission, vision, goals and objectives, the future (near term and long term) will become clearer for us all. I urge everyone to be patient, and to support wholeheartedly the PM SALE in this new endeavor.

Thanks to all the great people at LMP, who supported my efforts at integrating the organization into PEO EIS and getting the Project well on the way to successful completion. Also, thanks to Nick Castrinos, the Deputy PM LIS, who acted as the PM in my absence for the past five months. Finally, thanks to all the PM LIS team who adjusted smoothly to the several changes that occurred as a result of the PM SALE ramp up and my temporary assignment to LMP. Everyone did a great job!

Best regards,

COL David W. Coker
Project Manager
PM Logistics Information Systems
